# Pubcast Episode #12
Tuesday, 07 July 2009

Episode 12 of the IT Security Pubcast.

Symantec has recently released the14th Internet security threat Report. We invited Grant Brown from Symantec into the studio to review the state of the threat landscape.

The Symantec 14th Internet Security Threat Report (ISTR) says that :

- malicious activity has increasingly become Web-based;

- attackers are targeting end users instead of computers;

- the online underground economy has consolidated and matured;

- and attackers are able to rapidly adapt their attack activities.

The ISTR has become an industry standard for tracking the latest trends in the security landscape, and is referred to by organizations across the globe. We invited Grant Brown from Symantec into the studio to discuss the latest findings.
