

## Pubcast: Secfault - ZACON Reviewed

Tuesday, 08 December 2009

Pubcast: Secfault, the Durban leg of the Pubcast has been created to address the more technical aspects of security which the Pubcast has tended to overlook.

In this episode Matt and Ralfe discuss some of the highlights from the recent zaCon conference. Along with the banter about South Africa's first community driven information security [hacking] conference there are healthy debates on the OWASP Top 10 for 2010, new versions of Nessus and Metasploit as well as an interesting look at the spam machine.
